For 19 years, Dr. Andrea Martin was a professor at Worcester University in Massachusetts, where she taught many classes, including several on UFO disclosure. She began having extraterrestrial contact experiences between the ages of 2 and 3, and realized she was a walk-in from the Pleiades. Between the ages of 5-8, she was subjected to Military Abductions (MILABs) where attempts were made by the Raytheon corporation to study and weaponize her telepathic abilities. As a teenager, Dr. Martin was subjected to trauma-based mind control and memory wipes at various military facilities in Massachusetts like Hanscom AFB, and also abused on antigravity military craft where she had been taken for

contact with a Tall Gray.

She claims to be in telepathic contact with her extraterrestrial husband from the Pleiades, Eeka, who is part of an extraterrestrial contingent associated with the Galactic Federation of Worlds currently working with the USAF. Dr. Martin says that he meets with her by projecting his astral body to her home, as it is still unsafe for him to physically meet with her. She claims that beginning in June 2025, human-looking extraterrestrials will begin physically meeting with starseeds who are ready, and the contact process will gradually unfold over the next year.

DR. SALLA: For 19 years, Dr. Andrea Martin was a professor at Worcester University in Massachusetts where she taught many classes including several on UFO disclosure. She is a gifted author, artist, mystic and clairsentient. She began having contact experiences at age 2 and discovered that she was a walk-in from the Pleiades.
ANNOUNCER: We are listening to Exopolitics Today with Dr. Michael Salla, your source for the uncensored truth regarding the human extraterrestrial, global and political agenda. Click the like button and subscribe to this channel. And now, here is Dr. Michael Salla.
DR. SALLA: Welcome Andrea to the show.
ANDREA: Well Dr. Salla it is great to be on here, it's an honor.
DR. SALLA: Okay, well you know you can call me Michael, you're a doctor as well.
ANDREA: Tell everybody just calls me by my first name.
DR. SALLA: Yes, so that's great. So why don't you just kind of like begin with these classes. I mean you were nineteen years at Worcester, okay.
ANDREA: Yes, Worcester. I'm technically still there. If we ever get students back, I'll be back to work. But yes, I taught a bunch of different things over 19 years and mostly Irish colonialism, my studies in literature. And then I moved into whatever would keep people interested. So the last two years I began teaching classes on disclosure. So that's where I was when we finally ran out of students last fall. It seems to be some strange occurrence that dropped our

numbers. So a lot of us were laid off. Yes, I mean the disclosure thing was definitely a challenge I would say for the students to really wrap their minds around. So that's good.

DR. SALLA: Right, and what was the reaction of the students to recent developments? I mean, because the last few years have had some pretty big kind of like official announcements and congressional hearings. Well, how did the students react to that?

ANDREA: Yes, I was actually surprised. The majority of the students weren't really able to process it. Either it didn't seem significant or the information didn't really sink in. And some were afraid and others were just very distant, very resistant to trying to understand any of the information. So it's they definitely, I would say, the vast majority were more likely to respond to the powers that be, NASA, whatever they said.

DR. SALLA: Yes, well, I had the same experience. Back in 2001, I was teaching a graduate class and I showed them the video of the disclosure project. The whole thing was on the syllabus and all of that. So they had plenty of time to prepare. But anyway, so we went into the class. I showed them the first hour of the video of the disclosure project conference. And then I kind of asked them to line up in terms of do you agree that with these whistleblowers, or do you disagree that they're kind of lying or that there's no evidence for it? So I found that only two out of the 25 students thought that the whistleblowers were telling the truth. So the other 23 were just totally as you as you experienced and just went with the official narrative.

ANDREA: Yes, if they even knew what that was. The ability for the students to process any sort of historical or certainly political information, they just don't have that background. So even when I would bring up the information from World War II and the Nazis, and they didn't even really know what that was.

DR. SALLA: Okay, so you talked about the Nazi flying source of projects?

ANDREA: A little bit. I tried to keep it so we didn't go in too far. But yes, I did a lot of use a lot of Dr. Greer's testimonies from astronauts, policemen, anybody who worked in these think tanks. I don't think they really understand even what those think tanks were. So something like Lockheed Martin, Boeing, I know they wouldn't they wouldn't

understand that. So there's a lot of satellite knowledge. It's an interesting field. Once you start to get involved in it, you do need a lot of satellite information from many of you have quantum mechanics, you have electrogravitics, you have just electrical type science understandings, history, politics. So it's great to put that in front of students can be a little complicated.

DR. SALLA: Right. Yes. Okay. Well, it's but you're still associated with Worcester University. So hopefully with when UFO disclosure happens, they'll call you back and you can continue teaching those classes.

ANDREA: I want to get out of this. My goal is to get off this planet.

DR. SALLA: Okay. Well, talking about getting off this planet, you were two years old and you began having extraterrestrial contact experiences. So what did you tell us about those experiences? And yes, please tell us what happened.

ANDREA: I mean, when you're when you're two or three, I'm not quite sure exactly, you don't process the information like an adult would. So I never understood that they were extraterrestrial. I just assumed that they were family members. And even the idea of going up on ships didn't doesn't process when you're two or three, you just go with the flow. So I none of it ever really seemed unusual to me, them talking to me, their presence, all that was just a regular day.

And it was very calming, I guess, if anything, it would be the best way to describe it. As a child, it was like you're meeting your families, they would give me instructions whatever instructions they're giving to a two-year-old. They basically were just trying to introduce me to family members. They're like, this see you need to look at this person here and look at this person here. They would guide me as I got older to look at certain music, to listen to certain music, to watch certain movies, and then try to kind of they were they're trying to tap my memory in a way. So the contact experiences were sort of just very smooth. They didn't they weren't nothing really stood out as far as I was concerned. It was just very natural.

DR. SALLA: Interesting. Now, will you actually take an up on the ships as a two-year-old? And how did they look and how did the ships look?

ANDREA: People, I mean there was, of course, my man, he was the

one that took me up. And I think I just they just would play with you like a kid. And then I would just come back to my house. Yes, it wasn't I mean, it wasn't like they can do like when you're two. So it's just they look like people. I don't remember a lot of beings around me. But they looked just like regular people. They wore different clothes. So I thought as I got older, they were from the Middle Ages.
Oh, you try to figure these things out and put pieces together because I think when you're a kid and somebody says alien, you think something like a little green man or a Gray. So I never thought of them as ever, never, even now, they're not alien to me.
DR. SALLA: Right. Okay. So you also discovered or learned at that time, around two or three, that you were a walk in. So can you explain that?
ANDREA: Yes, well, it makes sense now, then it didn't. But so I remember the whole process. When I left Erra and when I went on to the intergalactic confederations ship and the last thing I remember was walking down the hallway.
So when I was back home on Erra in my home Eeka is my husband and he didn't want me to go. And this scenario I actually find with my clients as well, that there was sort of a rocky experience with their family back home before they decided to just to starseed or walk in. And they knew that this was going to be very, very difficult and dangerous. And I just remember telling him that I had to do this because where are we going to run if we don't fix this problem? And ultimately he agreed because then he joined the Galactic Federation. Neither of us were into any of this. We were very quiet. We live in a rural area. We never had much to do about a whole lot of anything. Hay seeds, I mean, it's where you want to call it hay seeds.
DR. SALLA: Yes. Okay. So you and your husband on Erra in the Pleiades, you lead a little quiet rural existence and you learn about this kind of mission or envoy program to go to Earth and you volunteered and he, Eeka,wasn't so enthusiastic about it.
ANDREA: He was very angry about it. Okay. Yes, we never fought because I, I've actually, I was we've been together since we were kids. We grew up together and they just naturally progressed when we came a couple. So we never really had much, we always had so much in common that this was a strange experience to be on that kind of

conflict level.
But yes, it was, it was known. The Earth situation is known off planet on many different planets because it was a very critical aspect or a sort of point in the liberation of this solar system and also the other ones around.
So and of course we knew what was going on with the other beings, the Venusians that would come on here and things like that. So I was friends then with Semjase, which she told me I didn't remember until she's like, Oh, we've been friends.
DR. SALLA: But yes, and it was for people who don't know, just explain who Semjase is.
ANDREA: Yes. So many will be familiar with her from her contact with Billy Meyer. So yes I don't remember leaving Erra, but I, the last thing I remember was there was a, there was training that it was quite a bit of training involved and then walking down a very, very high ceiling craft, a white, very organic.
And that's the last thing I remember and then waking up in, in a child's body feeling very, very out of body, most of my life. This is something I also see with clients where you, you never really sort of commit in a way, I think, to your physical form. And I always remember just observing, just trying to, I don't know, like, go undercover basically. Like I didn't, I never wanted people to see me. So I hid my whole life. I always felt that something was watching me as a strange sort of sensation of that, but it was always a struggle because I never knew what people were doing, what my parents were doing, what the other people around me were doing.
So the animals helped a lot. We always had chickens and a cat. So that sort of I gravitated towards animals. And I didn't have friends and all that stuff. And but it was always very challenging to like, understand, and I would ask my parents a lot about the way people were acting and about the way society was. And it never, it never made any sense to me. So I just stuck with animals because they made sense.
DR. SALLA: Okay. So I mean, you, you, you come from the Pleiades from Erra, in particular, the planet. And so you wake up, I mean, you're an adult, you've volunteered, you've gone through training and you wake up in a child's body. Now, what was that like? I mean, did

you have full memory of your life in the Pleiades or how did that play out?

ANDREA: You do get a lot of mind wipe. And you're also limited by the physical structure of a child's body and also the lack that happens in a human brain here on a Terran brain on this planet. So we're all human, but I mean, it's the Earth's people. So it's kind of a strange. You just don't feel like it's hard to settle. That's probably the hardest thing. You just spend most of your time trying to kind of escape in a psychic way. You tend to astral project yourself to different things, but then you're limited. You have a strange sensation of longing and that there's something missing. Something's not working right.

And people would notice that because I was always very quiet, very shy. That's how I learned how to cope with everything. It's just really become like a shadow figure, but most people would notice like you're very adult so I never did anything that really kids would tend to do. So and I was the only child as well, but you just would process information very differently.

And anything that was kind of violent or mean-spirited, it was just really a challenge. I mean, I would ask my mother about that. I'm like, why, I asked my mother about like what's a utopia? Cause I heard that somewhere and she's like, oh, utopia is just this place when everything's and everybody can never have that, but it's this place where everybody is like happy and everything's well.

And where's she going to have that? Oh, like it made perfect sense to me. Like, who wouldn't want that? I think everybody wants that. She's like, oh, you can't, you'll never have that. And I just told my father when I was a child that I didn't want to be human, I wanted to be a horse or some kind of animal when I grew up. And he said, you can't do it. That's like, oh, what am I doing?

DR. SALLA: Right. So what was the role of send Semjase in your training, preparation for coming to Earth? Or, or did, did that involve you actually being on Earth?

ANDREA: Yes. No, she didn't actually return to me that I know of. I have to ask her again, but I just remembered her coming in about five years ago when she stepped in. And I didn't recognize her initially at first. I recognized her, but I didn't put two and two together. And I was just doing farm chores and she just came in. And I felt in my body that

she was trying to remind me of my femininity, because I was very I'm asexual. So I've never had any interest in humans, I don't understand human relations.
That's another part of my life, and I had suffered depression for many years and anhedonia. And she came through and I felt different. And I kind of like felt I'm like, what is this?
Then she said “It is me.” Like I see her, a blond woman and I knew she was a Pleiadian. I'm like, it's Semjase.
So I blocked it off a little bit at first. Then, Semjase from Billy Meier. I'm like, she's like, she's trying to run this through my head. But I think for what I've known as again, not only myself, but in most contactees is that this kind of like high level contact is something that you don't want because why would someone like that come near someone like me? And then you never really would want to reveal it to anybody because you'll just think you're crazy or trying to be a show off or something. So it was the extraterrestrials that forced me to come forward and to be clear and to state the different things that I've experienced.
DR. SALLA: Okay. Now as for the walk-in experience, I mean, just going back to your two years old. And you just wake up and you in this human body. Well, what happened to this, to the soul, I guess that was incarnated, that was born in that body. And was it was that soul just swapped out. Did it just choose to leave? I mean, what happened?
ANDREA: Yes, it chose to leave. They swap them. Yes, they can move consciousnesses around. It's not okay. They can pull me out now, but I've in fact asked them to do that. And I said, I want to be pulled out and they won't do it. So you can pull me out or I'm going to pull me out and then it's begin to end up in a conversation.
DR. SALLA: Now as a child, I mean, you showed you were kind of well, let's just say very skilled or talented though you said you were talking like an adult. So I mean, how did you stand out or how were you different to other little two, three year olds?
ANDREA: I never was around them. So the only time I had access to children was when I was five and my mom tried to take me to a like preschool setting, which ended up being a very short-lived experience because I couldn't identify with the other kids, but I could telepath. So their behaviors were confusing to me. I didn't understand them.

They were very loud. I actually found it disturbing. It's the way they moved and the way they spoke and the way they would yell and be rough with each other was like horrifying to me. And I went, so I just went off on my own and did my own little thing.
And I remember the, I don't know how to call them, kindergarten teachers or whatever they were at that time. They noticed that and they were like, “Oh, look at that.” I could hear them “That kid's odd.” Like there's something off. So then I was the first time I ever, I realized that, Oh, there's something wrong with me. Like, so when my mom came to pick me up and she said, “I'll let you have fun.” I'm like, “I don't want to go back.” She's like, “Oh, I won't take you back.”
DR. SALLA: So you were telepathic. I mean, you could read minds of other kids or adults. And when did you, when did that ability kind of like switch on?
ANDREA: I think it was always on. It was always as far as I knew it was always there. I switched it off later on. But as a little kid, yes, during most of my childhood, even into my teen years, it was still sort of pushing forward. I didn't know what it was because nobody ever talked about that kind of stuff. But I would, I can feel some clairsentience. I can feel any being, trees, flowers, animals, people, I can feel them. I can enter their body, which I was doing as a child. But now I don't do that. That's out of bounds. But when you're little and you don't know anything, I could. And I think they wanted me to do that because that would give them information. So it was definitely disturbing because I had no way to process this. And they didn't assist. They were just allowing it to happen.
DR. SALLA: So at some point, you come under the attention of the government or the military. And I mean, you're somewhere between the age of five to eight, you're abducted by the military in a MILAB, or I guess had several MILABs were done. So you want to explain what happened?
ANDREA: Yes. So that would happen at night. And I remember just being terrified as a kid. And I would stay with my parents. I had to stay in my parents room. I was completely terrified at night. So this was, I don't know if you want me to name names, but this is in Massachusetts where I live. There is a base and others. There's seven.

DR. SALLA: Yes, you can name things.
ANDREA: They're both your name based on places. One is Fort Devens, Fort Devens was a major base during World War II. My parents both worked there. My father was military, he was army. He went air force to army. And I was taken to under the DUMBs, the underground facilities here. There's quite a few tunnel systems that run from Sudbury to Maynard. And under Maynard was an old Woolen mill that Digital (DEC), now a failed company, but Digital was there. And I think they were certainly part of it. But Raytheon also had offices there. It was that place that I was primarily taken to was an underground and it was Raytheon that did most of the situation. MIT's Lincoln Lab is also part of this. It was through MIT's Lincoln Lab while I was trauma bonded to a friend. What they tried to do with Raytheon is access my ability to control minds. So they wanted to be able to use that either use me or just about collect that technique so that they could control, weaponize it to control crowds. They failed ultimately. So I don't remember exactly what they did. I do remember not being able to move. But yes, it was definitely it was human in the Raytheon base, as I got older…
DR. SALLA: Before you get to that, just explain how you psychically controlled people. I mean, just naturally and then what they wanted to do.
ANDREA: I didn't use it as like a mind control thing, but I can influence people and animals how they feel basically. So I can project a type of, I don't know, a field or something where it puts them at ease. And it helps people like trust me which I never knew that that's what it was. I didn't know that we're trying to get that for me. It was until recently when my extraterrestrial contacts began to reveal to me this is what they were doing. So I remember, well, they had put some firewalls, some Semjase actually explained to me. There were some basics. She says it's like a firewall they had put into place. So when they tried to either chemically or using different types of electromagnetic frequencies and sounds and infrasounds, things like that, I basically fried their equipment.
DR. SALLA: Okay. So this is Raytheon trying to weaponize this psychic ability that you had at that time. So yes, I think you were going to talk about the extraterrestrials at the bases

ANDREA: or the Grays. Yes. Well, that, I think about now when so some of the times are, I think the tall Grays, one showed up when the humans couldn't access this stuff, they called in some tall Grays and they couldn't access it either.
And they then took me up onto a ship. And that was tall Gray. That was strange because I couldn't move, but I can see the ship. And you can tell it was not an extraterrestrial ship, it was an Earth UFO, large ship, it was just an Earth military ship. And I could see it was very, very open inside there, like a hangar size open.
I could see military men and I could see the tall Grays. And he was just getting information out of me. And I knew there were other people on the ship as well. And I remember just hearing him tell them that "She's, this is no good. This is junk. You need to get ready to kill it. Get rid of it." He wouldn't say the kill is just nothing to him. So or it whatever. He was just like, you should kill it.
And the military was kind of like, well, not really. We shouldn't we don't, we this is still useful, but they also felt uncomfortable killing a child.
I think I would say that may seem strange. But at this point, whoever was there, it definitely was uncommon. I remember him being sort of put out, when, he saw me laying there in an Ahel body. That's so strange.
DR. SALLA: Can you explain that?
ANDREA: I mean, I can't explain that. He must have seen the DNA or something. But I just remember him seeing me in my Ahel body.. And he said, this is junk. This is we don't want this is junk.
DR. SALLA: Real body, we're talking about, your real body on Erra in the Pleiades.
ANDREA: Okay. This is I couldn't, I didn't know what was going on. But ultimately, I then ended up telepathing with a GFW ship where my husband was working. And I was streaming information from what was going on at the ship. So the ship was getting ready. They were getting ready to rescue. And there was a lot going on. And they're there in full uniform for this kind of thing. And I was transmitting this back. So he was, he was actually viewing through the Gray, he was viewing through my eyes, what was going on at the GFW craft.
So I know now what they were doing, they were buying time. So they

allowed this transmission to happen. I think the GFW actually turned me on to allow that they probably took off their cloaking so that what was happening on that ship would then be relayed back to the Earth to the human ship that I was on. So I was just feeding back information this loop. And I saw my husband there. And he wasn't, he was going to be on the mission, but he couldn't do it. They said you were going to be a liability. I hear the word liability. So they pulled him out and they replaced him with another person. And the next thing I know is was they board the ship. And I wake up in my bed.

DR. SALLA: Okay, so the Gray, the tall Gray was using you to spy on this collective federation of world's ship.

ANDREA: Well, he wasn't so much spying. They were controlling the situation. So they opened up a line of remote viewing or telepathy between me and it or whatever, but he had like a masculine aura to him, this tall Gray, but I don't, yes, I think my what I was told was that they were buying time so they wouldn't kill me.

DR. SALLA: Okay, so the Gray, this tall Gray wants to kill you. He's telling the military get rid of you. They're balking at that. And by that time you got rescued? I mean, is that what happened?

ANDREA: Yes, when they board this wasn't just me. Everybody else on the ship was rescued. And they were the Earth people who ran the ship were chastised, you shouldn't be doing this.

DR. SALLA: So. Okay, okay. Do you remember anything about the rescue?

ANDREA: Not about it, no, I don't remember. I just remember them coming on and talking to them. The Gray was gone. He was gone before they boarded sometime between, I just remember bits of this work. And then they come on and they're full uniform and they were talking to the soldiers.

And they were kind of like, yes, this isn't this isn't kosher. And they were like, yes, all right. Okay because they knew, I mean, they're already connected, right? So they were kind of like, yes what goes on in Vegas stays in Vegas kind of thing.

But I know now that the reason that the Gray wanted to kill me was because they knew they couldn't access what I had. So I was a danger and they needed to erase me as a danger.

DR. SALLA: I see, so at the around age seven, you, I guess, were shown a blond man that you would be interacting with. Can you explain at seven years old, what happened? I think it kind of came into the situation. Eeka came into the into your life in some meaningful way.

ANDREA: He was already there when I was little, because he was the one that would take me up onto the ship and play with me. And there's some other woman there. I don't know which I have to ask who it is. Actually, I don't know. So there was another woman that would be there too, when they would just play with me. And then when I was five years old, I was sitting on the side of my house. It was summer. It was nice and I hear them and they said you have a very important role to do.

When you get older, you have a very important role to do. And I'm just sitting here and go at five going. Okay, what does that mean when you're five? You're like, oh, all right. But I think it was as an etching into my mind that I wouldn't forget what was going to play out as we see now. But Eeka, they would show me him just as a man standing there, but wearing clothes that to me looked medieval. Now it's the clothes we wear back home, but they would just say, you will meet this man. You will meet this man. And I'm just okay. Yes, that's cool. He's a nice guy. I like him.

DR. SALLA: So, up until the age of 16, you got attacked by corporations at age 16 that tried to do something with your psychic ability. So what happened?

ANDREA: Yes, when I was a little younger than that, they took me back to the it was Raytheon again that took me back and they still tried to access my capacity because it was getting better at that time. And then they were working with these, oh, God, I don't know. They're like a strange, almost a clone of a Nordic.

And many people have access to these beings. They don't look like the Pleiadians, but to your average person, it would physically be almost indistinguishable, but they have a strange carriage and a very cold, very tall. And they have a very cold, rigid persona. And that's the men and the women as well.

And it's almost like they don't know how to interact. They're almost

they're very like, behaviorally distance. And I remember them being there when they tried to use trauma. And I was raped by military. I was raped three times. I was brought back three times. And that's what happened. And I remember a woman there that was one of these like clone type Nordics. And there were some men as well. And it still didn't work what they were doing. During this time, too, they were using different trauma bond type technologies between the Raytheon base at Maynard Sudbury and then the MIT Lincoln Labs and Hanscom Air Force base.

DR. SALLA: Well, that must have been so traumatic to go through that experience at age 16. I mean, is that something you remembered? Or was it just kind of like you kind of suffered from post-traumatic stress or something?

ANDREA: Yes, definitely. That's when I remember having a lot of the trauma in my body, because they mind wipe you, leave there, you don't know what happened. But your body remembers. And that's what I really first noticing my serious fear of humans. Yes, it's just the sound of a person. I can't be touched. Like, anybody touches me like people want to hug you.

DR. SALLA: I could imagine the stress, the kind of the trauma that you carry. So when was it that you realized what happened when you were 16?

ANDREA: Yes, I didn't know then. I know now. But I just remember I'm going to say 14 15 16 is when this happened. Talking to people was extremely challenging for me. I just want to hide all the time. It was just very, any kind of interaction created a high stress response. Even now, I don't want to see people like if I'm walking somewhere, I kind of keep an eye on them. It's that wild animal kind of thing. Yes, the way when I hear them, when I hear humans and stuff like that is very much just going to fight or flight

DR. SALLA: So Lincoln Labs, what role did that play? And you, I guess trauma bonded with Patrick. So who was Patrick?

ANDREA: He probably doesn't want to come forward too much. He's a friend of mine. He's a he's a starseed as well. He's a tall starseed. He's also from Erra. And he was taken to… I was left in the Maynard base. And I think also the Turner jump point in like Lancaster, maybe six minutes from where I live. I have this on I have videos of the areas

people can see it on my channel. So that always gave me weird vibes, that place. So I was here and they would then sync you up and he was taken up to Lincoln Lab.
So in the trauma bond situations, what they want to do is set up sort of a they want to have you connect with another person so they can technically use the two of you. And they have you watch or experience traumatic things or watch the other person experience something traumatic. So maybe they would torture him or drug him or something like that. And I would have to watch that, so that we would then be psychically attuned to each other.
So that that was a lot of the rock and roll stuff that was happening here in Massachusetts. We were, Massachusetts, Connecticut, and New Hampshire were definitely hot spots for a lot of this kind of nefarious events that people were doing. They also used up on the North Shore. I have a friend of mine who witnessed government officials giving teenagers LSD and psychotropic type drugs. So they were they were giving that out.
DR. SALLA: Right. Okay. So with these trauma-based experiences that you had at the time, were you also in touch with the extraterrestrials or the positive groups? I mean you mentioned the Galactic Federation and did they kind of like stay in touch with you?
ANDREA: Until I shut them off. I think well, I tried to when I was in my 20s. You know, you get into the matrix, you go to college, you get degrees and you just want to live your life kind of thing. But there was always a I was always compelled to do things or not do things.
So they were they were definitely guiding what I did.
They guided where I live now, which I've never I've been here for 52 years and I'm still here at this one old house. So they made that I have to stay here for now. And it was a protection zone basically because I didn't experience a lot of the extreme trauma that other people in the MILABS SSP programs experienced. So that must have something to do with this property. We're on 40 acres and they were still sort of behind they took more behind the scenes role at, I think like 17 18 went to college. They took a little bit of a back role, but they always would remind me that there's the man, that there's a man you're going to meet.
DR. SALLA: Okay, and this this man you're going to meet that was

again, Eeka.
ANDREA: Yes. Yes. So I think it was because there was a blond man, a blond man.
DR. SALLA: Right. So how did that unfold? I mean, you meeting with Eeka as an adult.
ANDREA: Yes. Well, that was so yes. I mean, it never the idea of it never left my mind, but to me, it became just weird. It came stupid that it just didn't make any sense as I got older that I would be meeting this man. I got to why was I thinking that, whatever. And so I ended up with in the MILAB experience, they used agents to hit me and give me depression and anhedonia.
Yes, they basically wanted me to kill myself, just get rid of me at this point.
So I suffered from depression for quite probably 10, 15 years. And it would be on and off and then we get worse here and there. And at that point, I actually began working with a woman called Louise Jones out of England. Psychic LJ is the codename for her YouTube channel and everything. But I began working with her because I was going to commit suicide. So she was the first person that began to kind of open me up to what this was all about, these experiences.
And she told me you're definitely not…, I would tell her, I don't belong here. I don't understand anybody. I'm afraid of everybody and have all these problems.
And she just kind of helped me through it. I mean, she I can say she's patient because I was, I'm difficult. I also worked with Rebecca Rose during the roller coaster aspects of the attacks from agents. But yes, it was the evening actually and it was really at the point where like, I'm not going to stay on this planet. And I was just sort of quiet and trying to connect and he walked in. And it was just like, oh my god, you're for me, it was just like, that was just it's just a massive flood of vindication. Like, I knew everything, it was just this massive download of memory that it was just incomprehensible with his presence. And he stood, he came via astral. And he stood on my right as clear as anything that's real. I was like, I got you're real, basically. And he just he just hugged me. And that was the beginning of our relationship.
DR. SALLA: Okay. And so at what age were you when that kind of happened?

ANDREA: I was in my late 40s.
DR. SALLA: Okay, so late 40s, you reconnect in a very deep and powerful way with Eeka, you get the full download. Are these memories of life on Erra?
ANDREA: No, just about it was it was I guess them proving everything I experienced was real. Right. Just a massive I mean, they took me like a like a full life reflection. It was just intense. I mean, it did the energies and everything was just like through the and for folks that that have had this experience, it your head just explodes. I mean, literally.
DR. SALLA: Okay, so it sounds as though you've got a lot of clarity on all these experiences going back to when you were a young child and in the MILABs and the trauma based experiments, all that stuff was I guess, jumbled or mind wiped and you're suffering post-traumatic stress, because something happened, but it's not in your conscious mind. And then at 40, you have this experience with Eeka and it's all there.
ANDREA: Yes, well, they were trying to explain stuff to me as I was really would make me see certain movies. And so for me, if I would go to watch something like a Star Trek or a Star Wars movie, it felt real. I would watch movies with my father on space shows because he liked that. And it just felt like I understood it. It made sense. It didn't feel like a show to me.
But of course, that would make no sense to an average person. You're just saying, who knows, they were always feeding me music as well. They're like, I would feel compelled, like you need to like something would just force me to focus on something. And I didn't know what it meant, but I just felt I have to focus on this. This has meaning. Remember that means but now it all makes sense what they were trying to do. But I just kept resisting it because again, it that didn't make any sense.
DR. SALLA: So you have that experience with Eeka, contact is reestablished. You got all these memories back now. So did you have more contacts with him? I mean, and how often have you had the contacts? And what's the nature? What has been the nature of your relationship with him?
ANDREA: Yes, so at first, it was just that he came and he just

hugged me and held me. And then he would just follow me around. So he would be there. Just as I went about my day, he would spend a lot of time there. And then he would start to talk to me. So he just kind of just watch me and I could feel him right there and right back of me or on the slide or something. I almost felt like I was going to smack into him because I'm a very jerky person. I move, I run around. I'm very quick.

And I would turn around and jump back because I felt like I was going to smack into a tall man. But you know, I only came up maybe to his chest. It is and I just whoa, and I go, then I got the point where he was like, don't stand close in back to me like that. So he started interacting. He rides with me in the truck. And little by little, he just sort of began to introduce that we have a romantic relationship.

And that was kind of like, I kind of suspected that there was something there. But yes, he started to kind of slowly allow that because I had told him that I'm afraid because I fear humanoids. I fear human form. So he had to take a little bit more cautious approach to what he would do was desensitize me.

I know what he was doing now. So he would just sort of like touch me over and over to kind of my body would be like human and it would just feel better and better and better. And our relationship just connected, connected, connected more and more through the telepathy. And we would have conversations.

DR. SALLA: Okay. So with the relationship with Eeka, I mean, he's with you a lot traveling with you, but is it like always in the astral form?

ANDREA: Yes, and the astral, yes.

DR. SALLA: So when you say you had a romantic relationship with him, I mean, he's in the astral form. So that relationship is not like a normal type physical relationship.

ANDREA: It is. Yes. I help people with that because it's incredibly real. I can feel that like what he saw. I can smell him. He wears the perfumes. I can touch him. I can feel him. We can share food. Like if I eat something, we can share that. Our bodies have been synced. If he becomes frightened, I can feel that. If I become frightened, he can feel that. So we're completely synced.

I see him in like try to when I teach people this. So your eyes only collect light in information, but your brain actually is what sees. So

when you're telepathic, you're bypassing your eyes and you're just seeing with your brain. So I see him close up. And he shows me things I can see through his eyes. He can see through my eyes. One of our sort of things I got when we first started to get close again, I got an absolutely photographic visual of him. And the wind was blowing his hair down and on so strange.
And then I realized he was in a helicopter and everything else came into view. And he was wearing a uniform. And I said, “Oh my God, I said, are you in the military?” And he's like, “Yes.” And do they know you're going to get killed? Are you crazy? And I was just so I told my friend Patrick, I said, Eeka just showed me this morning, he's in a helicopter. He's in the military. He's in the military. And Patrick, “No,” I'm like, “Yes, the guy's going to get himself killed. What's he doing?” So it's absolutely photographic.
DR. SALLA: So Eeka was part or is part of an extraterrestrial contingent that's serving with the military or the USA Air force in particular.
ANDREA: He is currently at Cheyenne Mountain.
DR. SALLA: Okay. So what's he doing at Cheyenne Mountain?
ANDREA: Right now he's working with a task force that is dealing with how they're going. Well, he's just part of it because obviously it's global, but first contact for envoys, starseed envoys. It's all of the different ways in which people, so it's one on one, basically, how the extraterrestrial family member is going to be physically connected to their Earth starseed, envoy walk-in person.
DR. SALLA: Okay, so this extraterrestrial contingent working out of Cheyenne Mountain, they're locating different starseeds.
ANDREA: Well, they know that. Everybody's tracked. All the starseeds are tracked. Yes. So we just working with a certain section. And it's not just at Cheyenne Mountain to be at different bases. But yes, they're getting ready for contact. In fact, one of my friends just had it.
DR. SALLA: Okay, so I mean, what happened with your friend? I mean, that contact, what are we talking about a ship landing or then meeting an extraterrestrial?
ANDREA: It's going to be based upon where you are, what your contact is. So are they human or are they not? It's going to be done in

stages.
So the initial stage is for people who have already had significant contact with, if you're going to have a physical meeting. So this is what we negotiated upstairs and as well as down here, that we want physical contact as soon as you can do this. So we, I have a group of people, of starseeds, that I work with here that have been in negotiation to move things forward with Galactic Federation staff and with our ET contact.
So to be broad, I have this very specific outline that they gave that Eeka gave to me of what they're doing on my GrowingUpAlien channel. So people can go to this very, very detailed. It was like, I think it was over an hour that I explained all of the different contingencies that have been arranged for. It's actually two videos that I did. So it's almost two hours worth of that. It's very, very complicated, very, because security obviously is number one.
So areas are being prepared, have been prepared, they've already done. So they'll use things like, it looks like an orb and it will read the area. It'll also frequency clear the area. They have sent down people as well physically and astrally to check out the situation about where the different contact meet up places are going to be.
People who have had the envoys, only envoys, this is not for Earth people, just the envoys and starseeds. People who have had contact already and are in telepathic communication with their family will have physical contact first.
The next group will be those who are in contact with non-human looking. So Arcturians and Andromedons, people can be a type of benevolent Gray, something, where this person cannot walk down the street. That contact is going to be a little bit more complicated. You may actually be brought onto a ship.
So, but it's going to be one on one. So from my friend, who just recently had contact with her Arcturian brother, she saw a ship and experienced a very close astral contact. So that was her first contact. And for each person around the globe, it's going to be very, very, it's going to be last minute. You're not going to get much. They can't give much warning. And yes, from what they say, it is now.
DR. SALLA: Okay. So this extraterrestrial contingent working with the Air Force based at Cheyenne Mountain, they're kind of like, keep

being in touch with all the starseeds that a human looking and they're kind of helping prepare the groundwork for them to have a direct physical contact with their star family.
ANDREA: Right. Yes. Yes. Some will have it with their family, depending on your family. You know, if your family is ready, they're already on board with all the stuff. They will be able to meet this person. So there already are extraterrestrials by the thousands walking, living here on Earth already. Yes, that's been going on for a long time. So, but they are, they're already walking here. It isn't that but it's not going to be usual, but it's just complicated. So some of the it isn't just Eeka. There's many because it is so complicated. It's actually a one on one process. Because there are areas of the planet where it is dangerous to do this. So they have to kind of figure out, I mean, none of it is 100% safe. And they want to be clear about that.
DR. SALLA: So 100% safe in terms of like the military or the government.
ANDREA: Yes, that is what we were asking. So what I've been told is that it's sort of the rogue elements that are still sort of peppered around. They still have extraterrestrial technology, even though, well, we have extraterrestrial technology. Yes, we got ways out of way. But yes, they're still a very small risk, but not a zero risk.
ANDREA: There are some, so they know. They do not have the capacity to oppose it. But they have the capacity to mess up a few aspects of it possibly. What they're concerned with is regions where contact would be deleterious to the population where you would have backlash from the humans on the planet who aren't ready. So they're worried about that.
And that's why I asked me to do the secret. And again, depends on where you are. They're also worried about the bad guys, the Deep State remnants using this experience to launch counter-psyops. So hitting there, there's actually there was, I can't remember, there were two hours worth of notes he gave me. So like there was the first one they were worried about was just destabilization of individuals like in a family. Right.
So Eeka told people depending on your situation, don't go spreading the word, don't be running around. I just met my Sirian wife. Don't, he says, don't go tell the public yet. Keep it very secret. He says, and that

would be also something that you would do with your family. If your family is also going to understand this, my family knows already. They know who he is. They know that's not. We have ships over my house a little time. So it's not for me, it's not a big deal.
But for many people's families, it could be a big deal. So they're trying to avoid domestic upheaval. That's one thing.
Secondly, is they're trying to avoid media based psyop that would be sending out information to frighten the population. Oh, there's aliens that kind of thing. Because you still have a certain percentage of the population that might be on the border of, okay, this is okay, I understand that look, you're on a planet floating in space. So there are billions of planets.
There's people who are on the cusp of that. This is new to them. And they're processing it. So if it's done correctly, which is part of what my mission is now, these people will come to, “We accept this new reality.”
But if the media then begins to seed their minds with doubt, this could kind of mess up where we're going. The next group are those that are a little bit more. And these could even be conspiracy theorists, those people who doubt everything. They're fearful of everything. They're the kind that sort of watch dark videos all the time about how everything is going to collapse in the world. You're in a sink, you're io a flat Earth with a, all kind of all is all wrong and it died.
For that group, this would be a trigger for them, where the bad guys would use this as an opportunity to psyop even more. This is happening at “The end of days” or whatever. Don't trust these extraterrestrials. They're all bad. They're all with the bad AI. They'll go on with their psyops that way. That's another fear they have. And the worst fear is that you would have you have segments around the globe who are violent and who are deeply receptive to being manipulated for whatever I hate to say, things like religion, but that is one of them.
Or belief systems, cultural belief systems, what have you, who would openly try to be violent? And then the Deep State would enact violence and say it was the extraterrestrials. Who will not use any violence? They will. So we have a thing in place. Should violence erupt? They will teleport. They will not resist. They will, there will be no

sort of counter violence on their part. But right if they want to formulate that kind of story, this could get very complicated. So that's where we stand now.

DR. SALLA: Well, I do know that there is an extraterrestrial contingent working with the US Air Force for some kind of human looking Nordic's that I have been working with a military, ex-military now whistleblower or witness JP, we just use his initials. And yes, he did meet on actually more than one occasion, one of these extraterrestrials working at a military base.

So this is absolutely happening and he's talked about agreements. So and you're talking about agreements between extraterrestrials and the military and there's a kind of like those that are working with the White Hats or the Earth Alliance for a positive agenda. Cheyenne Mountain is sounds like that's a kind of important base for that.

ANDREA: Yes, Eeka works directly with humans. He's allowed to walk around the base. He's met many of the he showed me meetings where he's talking to, I guess they call him airman, non-officers. And they're and he shows he likes them. And they're very they really like meeting him. It makes him feel good.

But yes, he works with he showed me meetings with officers. He's not supposed to show me these things. So it's he showed me some of he says me now it's kind of okay to express some. But along the years he showed me what he was doing, which he was supposed to do. But yes, he even tried to he tried two years ago, he tried to physically meet with me.

DR. SALLA: But just before you describe the physical meeting, I mean, just so the audience kind of knows when you're saying he showed you these things, you're talking about you being able to see through his eyes. Yes, that you're connected in that way. That's interesting. Yes. So I saw the medbeds. I know Elena Danaan describes her relationship with Thor Han, pretty much the same.

ANDREA: Yes, there's millions of people that have this relationship. They just don't come forward because they get ridiculed. The clients that I work with, they get 100% contact, real contact, full on portals opening up nearby, teleportation. They see all kinds of strange things happening, light anomalies, craft, but I tell them not to tell people. People have met Eeka. He talks to anyone. He doesn't know, he tells

me. I'm just a man. But he's met several people. They know who he is. He doesn't go by the name of Eeka on the base. He has a different name. But yes, this is not rare at all. It's just people are coming out of the woodworks now because they feared, not only they feared ridicule, not only from other people around them, but they actually feared ridicule from within our community itself.

DR. SALLA: So have you actually met Eeka physically? Yes, when I was a child, okay, physically when you were a child and more recently,

ANDREA: No, he tried. It wasn't safe. I told him it wasn't a good idea. I said you're going to get killed. I'm just going to do this. And he was really trying to figure out ways. And he would compel me to be places. He's like be there tonight, be here tonight. And I was like, that's not it.

DR. SALLA: Okay, that's interesting. Okay, so you knew intuitively that you were being watched and that it wasn't safe for Eeka to come by.

ANDREA: I'm like, you have to use a craft and I'm not safe. Yes, yes. Conversations like I'm having with you. Not just Eeka. I talked to all kinds of people. I talked to Val Thor. So I've talked to, of course, Semjase and I talked to all my clients contacts.

DR. SALLA: Well, Val Thor, I mean, he's the kind of like Venusian ambassador that like, let's just say went to the Eisenhower administration in the 1950. That's the same one. So what's your relationship with him?

ANDREA: I don't so much. My relationship is more that I'm the kind of pony express between, I'll say Frank Chile. So he's his contact. He knows Frank Chile. So, Frank Chile thinks he can't telepath. So, Semjase is also great friends with Frank Chile. So we've been trying to get Frank to telepath.

DR. SALLA: For those that don't know, Frank Chile is this new UFO researcher that's been around for decades. And we worked with Frank on the Bill Tompkins memoirs. So yes, he goes back.

ANDREA: Yes, he's just a great guy. I love Frank. So yes, Frank asked me what he wanted to talk to Val. And I said, well, let me see if I can get in touch with him for you. And I did. And Val was just absolutely right.

DR. SALLA: How did you do that? How did you get in touch?

ANDREA: So what I do is, it's a brain. So this isn't people. Everyone can telepath. And that's why people who think they can't, you can. It's brain waves. So brain waves are like stimulants. So that's how they communicate upstairs. And you just simply send the intent to the person you're trying to contact. You're basically dialing their phone number. And their phone rings and they answer. And sometimes they're busy. So you make like sometimes I'll connect with people and I'm busy or they're busy. They connect with me. So basically you just feel them come in, you can feel them. And they'll show themselves.
DR. SALLA: Now, do you do anything to prepare yourself for that just to make sure that you don't get some astral entity imitating who you're trying to phone?
ANDREA: No, I'm not worried about that, not afraid of them. I, you know right away, if it's something like that.
No, I never had an agent.
DR. SALLA: How would you know?
ANDREA: But I just get rid of him fast. I don't mess with what I don't like. That was that was actually due to Frank. He sent me on some goose chases. So yes, I just knocked down his door and he answered and I just hurriedly said Frank Chile wants to talk to you. And I'm just pulling back. And he just kept pushing in. He's like, no, no, I want to have a talk to the public. And he said, so we actually go to Venus. And he sits me sits me down. And he holds my hand and he's like, no you need to we're going to have a conversation.
And I don't want, I just felt a little self-esteem human stuff. And he's like, no, we're going to have a conversation. I'm going to. I'm nice. Like you were going to take the time to talk. And as and Julian came over actually as well. And I told him I jacked I thanked him. I said, thank them for the work that he did here and how it made me so nervous when he was here and he's laughing and I'm like, Oh, I was like, and I saw Frank would like to talk to you. And he says, well, I'm going to take Frank on a ship. He says we'll just have a rain check. And I said, okay, so let me tell Frank, when you took him off that night.
DR. SALLA: Okay, so you said that they took you to Venus or Val Thor took you to Venus. We're talking astral.
ANDREA: We're talking astral. They do a lot of almost everything is astral. We do a lot of work astral. Yes, it's easier. Because if I need to

meet with somebody on Jupiter, they would have to physically bring a ship, teleport me to the ship, then take me over to Jupiter. And that's hard on your body. And it's just messy. It's like, why, why?, The physical isn't so much.

DR. SALLA: Has that happened to you? I mean, I know you describe when you're a child taken up into the ships. But as an adult, have you been physically taken up into the ships? So has it always been kind of like an astral experience?

ANDREA: All astral. Well, I was taken up by the military. Okay, yes, you described that when you were fired. Ships, I have to ask Eeka again, as far as I know, it's been all astral. And he goes astral as well. So he doesn't really leave. Sometimes he leaves the base, but mostly the work that he has upstairs, he goes astral as well. He would have things that we would have to do upstairs. He would come to me. And he would tell me we're going up. So they were, they would also bilocate me. So you get placed when I was working with the Galactic Federation. As the spy, I would be bilocated onto ships, but I was also bilocated to bases, military bases, where I would meet with guys in their star uniforms there, GFW uniforms.

DR. SALLA: Bilocated. So again, that's the astral, but you're, it feels like you're physically there.

ANDREA: You can smell everything. So I could see there, I talked to them, I could see the area. I was on the side, you feel like you're on solid ground, I could smell the pine trees, I could smell their uniforms. It smelled like metallic, like ship to me. I had like a strange smell, like two of the guys, there were two blond guys, and two blond guys wore blue uniforms. And one dark-haired, short-haired man, he seemed to be in control of those two and the yellow, higher ranking, he wore a silver. Okay. Also, bilocate me, they would be dressed in street clothes. And they would bilocate me to the cars they were driving, they were in, and I would just sit in the car with them and read and tell them all my information.

DR. SALLA: Okay. Now, this connection with Eeka and Cheyenne Mountain, and you know, you being able to see everything, when did that happen?

ANDREA: This was recent, because he was out of California for quite a while, but he would travel around, sometimes he would be in Florida.

So when he would go to Florida, he would try to meet up with my friend Linda in Florida. And they would spend time together. So he would relax with her. And, but he would move around because he was doing some of the time travel stuff. It's going to do with some of that. Just a couple of weeks ago.

DR. SALLA: Okay. When was the first time you that you recall being able to see through Eeka's eyes?

ANDREA: That would have been a couple of years ago, when he showed me the medbed technology, the healing technology on a base. And it was all of a sudden I get this, it's almost like a flip book, because he wasn't supposed to show me. So it was like somebody was showing me pictures, that's how fast his brain was. He was flipbooking it. And I said, whoa, whoa, I can't see, too fast for me. And then he slowed the pictures down. And he was standing up on like a balcony-like area. And there were contractors with trucks. And they were loading these like tube type, some kind of devices all packaged up. And he was just showing me fast, like I'm not supposed to show you this, this is the stuff. I was also shown in a very vivid image, two tall, I'm assuming they're Ahel, they're blond. They resonate. So I feel the resonance of the extraterrestrials.

I know what they are. They don't have to tell me who they are. I just feel what they are. And they were actually, it was two men. They're actually in a hospital and there was nurses there and doctors and they were explaining to them this new technology. So that was two years ago. So it was a remote, they showed me a remote view of what I'm assuming is to come.

DR. SALLA: I see. So I just wanted to kind of get an idea of when or how much of what you've experienced is, I mean, these are things that you clearly remember, as opposed to things that some might say, well, you've read the books of Elena Danaan, and that a lot of that has influenced your experiences, that these are actually just imagination as opposed to real contact experiences.

ANDREA: Which is why I do what I do is to help people who are afraid to come forward, because it's critical to the mission that all

these people step forward. And that's just extrapolation it's, these are experiences I've had since a child. And my experiences are completely different.
If someone was to compare Elena Danaan and her work, and mine is, they are apples and oranges.
So it's this, there's really no match because what I tell people always reminds people that everyone's on a different mission. And everyone, no matter what you're here to do, your piece of the puzzle is critical to the entire mission.
So never compare yourself to other people. Number one, number two, you have the experiences that you are meant to have. And if you haven't had experiences yet, you can have them. It's more than likely you're blocking them. But no it's, everyone's is absolutely crucial that they step forward in some way that they feel safe. No one's putting people in dangerous situations.
But when I resisted making my channel for a whole year, actually. But they kept forcing me and forcing me and forcing me. And I said, I don't want to do this. I don't want it. I'm not a public person. I just want to get out of here. And like, no, you have to do this. You have to do this. And it was September when I had a cave-in, Eeka wanted to do it. When I lost in my job, basically, I got laid off and I was like, all right, you know what, we're going to do it. And my channel is, is not about me. My channel is giving the other contactees through, I guess, me standing out there, not caring anymore.
I tell anybody in the general public I'm married to a man in a helmet. I tell them, I tell them, I don't care. And it's just making people step forward. What your average person who is a contactee, some of their experiences are unbelievable, unbelievable. And they're just afraid to step forward because one, their families can be a problem. Two, it could be work situations. And I would say probably the main reason most people don't want to step forward is because of the ridicule within our community itself.
DR. SALLA: Right. Well, yes, there definitely is a lot of ridicule. There's a lot of debunking that goes on. That definitely is what the Deep State does. Now in your case, I mean, you have a professional background. You taught for 19 years at Worcester University, and you develop a reputation in as being an academic. But you still decided,

despite that, to come forward to talk about your experiences that go back to childhood.
So you have memories based on these childhood experiences. And they kind of like that's, as you've described, they've evolved, you've remembered more and more at age 40, you had this big information dump.
So, I mean, just when was that just to get more context, that big information dump at 40 where you remembered all of the abductions, the MILABS and the contacts?
ANDREA: Well, it came in after the big download that everything I experienced was real, came immediately when Eeka first stepped into my space.
DR. SALLA: When was that? What year was that?
ANDREA: Well, five years ago, four or five years ago.
DR. SALLA: Okay.
ANDREA: Oh, yes, I was still working with Louise at that point. And I told her, I said, Oh my God, Louise, I said it, it happened.
DR. SALLA: So this was around 2020, I guess then, right?
ANDREA: Yes, it was around 2020. Yes, 2020. Yes. It was around March of that year.
DR. SALLA: Interesting., so that was around the same time as Elena Danaan started to kind of like have her experiences in and there are some important parallels. You've mentioned the Galactic Federation of Worlds and being able to see through the eyes and you also have mentioned Adana. This, commander with the Galactic Federation that you know her. Describe that How do you know her?
ANDREA: I just work under her.
DR. SALLA: Will you explain that. You work under her.
ANDREA: She basically said, “You're doing a great job, you and Eeka”, and so I basically work under Eeka. I have met her. There's so many people that work under her. She is leaving. There's a new person coming in. I work with him more. He's a very close contact of mine, but, yes, what's happening now is that these starseed envoys are coming online, *en masse* very quickly.
And they need to understand they are themselves first contact and that they're going to be getting information through them, either directly themselves real, they're going to start to realize what they're

doing when they go upstairs. And what Eeka and I are doing now is Eeka is funneling the information through me and I'm just presenting it. And I'm also working with some other people who have to remain behind the scenes due to their mission right now. And they're also sending me information. I basically consider myself a secretary right now. I'm just the messenger for what information is coming through from them and they wanted me to contact you as well. So they wanted to reach out to you.

DR. SALLA: Okay. Well we're are connected now. So I guess that establishes a line of contact with your kind of like ET friends. So, what do you see happening over the next few years? I mean, have you been given an idea of what lies ahead?

ANDREA: Yes. So I'm a very skeptical person because they've kicked a can down the road and we've gone upstairs throwing chairs basically. To be fair, I don't go upstairs and they know me upstairs. I let them have it. So we demanded that this can move forward. So this was supposed to have happened in January. That got pushed forward. So we said people are suffering down here.

This is about compassion. This is not something that you can just kind of play politics and let it all slide and let Earth kind of do its' thing. We don't have time for that. We need the technology down here because we can't even do our jobs. We have people who are the envoys in the direct ET contact down here that are in Terran bodies that can't pay their rent or having a hard time getting work because they've been targeted by agents and all. We've had it. It's a war.

So we've demanded changes be made and those changes were made. So I tell upstairs and I tell everybody, and that's the point of my channel is that they better deliver the information that I am handing to you. So the information they're saying right now is that it is contact now for the starseed envoys. This is it. Within the next month, most almost everyone should have contacted through June, June 21st.

DR. SALLA: Okay. So most of the people watching this interview on my channels, I mean, they're going to be starseeds. I mean, the vast majority of them will be starseeds. So you're saying all of them through June again, have some kind of contact.

ANDREA: That's what they said. And we said, we want physical contact. We don't want the same actual stuff we've been doing. We

want physical contract contact. And they said, yes, physical contact. We're not just going to come shake your hand and leave again. Like, okay, so we don't want that either. We want to live with you. Right. We want so they said, yes. Now, the proof, I always say the proof of the pudding is in the eating.
So, and I always say, they need to deliver. I mean, we're tired of the kick the can, we're tired of the carrot dangles. We're tired of just sitting here waiting for stuff to happen, because really most of the people that are on my channel, we don't want to be hearing. We want to get out of here. We're done with our Earth missions. We want help. Well, I want off. We're not happy here.
And many of us have even gave them that like, either you're going to take us out of here, or we're going to take us out of here. So, there were some issues with extraction. So that was one of our demands. They said a lot of people want, and then this is actually one of the reasons they wanted to connect with you, Michael, because they want the starseeds to give them their demands.
What do you want? What do you want? So now they know. So, the people who are starseed envoys, they need to, when they're in a private place, write down or whatever, speak out loud. What do you want? Say what you want to do, I want extraction. I'm done with my mission here.
I want contact. I want to have a clearer understanding of my mission, whatever it is that they want. I have a health problem, maybe, right, something like that. And this is, so they need to send their demands. And there's millions of us. So that's a squeaky wheel. So the ETs can only do so much, and they've been fighting very strongly on our behalf to give us compassion, to give us some succor down here. So, the more starseeds can scream upstairs that you have demands and maybe you want to break a contract, whatever it is. It's your life. So, yes, that's the main thing right now. Thank you.
DR. SALLA: Well, we're recording this on May 7, so you were told that June, so we're talking a month from now, that the different extraterrestrials, human looking organizations, human looking extraterrestrials up there, they're going to start having physical contacts with the starseeds that are ready, but for those starseeds to get ready, they need to do what you're describing. I mean, just send

their desires, or what they want.
ANDREA: Yes, send their demands.
DR. SALLA: Their demands. Okay. Now, I mean, supposedly there's 200 million starseeds all over the planet.
ANDREA: Exactly. That's a squeaky wheel. So let's go.
DR. SALLA: So, these contacts, I mean, it's not going to happen all at once for all of them, right? We're talking about, I mean, we're talking, it starts in June, and then it's just going to continue, and indefinitely is that it?.
ANDREA: This is what we've been asking them to clarify. Now I'm going to say based upon what would be logical is that the contacts are going to be spaced out. Some are going to be this June. This one is only for people who have already had significant contact. So someone like me, they're the ones that are going to be getting the initial physical contact.
*124m

Then they're going to start rolling it out. Now, I've talked to Eeka about one of my friends, he says, as it stands now, because some of these people are on other planets, they're not part of the military. So you'd be bringing in just civilian from say a civilian from Venus who has no idea what's going on, it really is not prepared for this, right?
So there are more complications with that. So this one person whose husband is still on Erra, they may not get contact till next year. So, and again, you have people who have Andromedan contacts who might be an insectoid whatever starseed here, the non-humanoid and even some of the humanoid, those are going to be a little bit more of a logistical challenge.
The same thing that this high ranking officer told me with the extraction demands that so many of us said, he says, we have to watch that because it's going to look like a rapture. So everything that throws a wrench into our abilities to enjoy life basically is coming from Earth humans.
They're the ones that they haven't really raised their awareness to just the common sense that you're on a planet floating in space that makes you an extraterrestrial. Everybody's an extraterrestrial to

somebody. So it's just trying to feed the information to the average person that like, you're a humanoid on planet Earth. There's billions of planets, trillions. I mean, out there the Drake equation on that
They have to get their minds around that that. Yes, which was of course the whole psyop of Earth itself. So, yes, we're constantly going up there and telling them, “Are you going to do this?” because we're sick and tired of it.

DR. SALLA: Okay. All right. So June is going to be when those that have been having a lot of ET experiences astrally and so forth, that they start to have physical contact and the rest of us that haven't had that kind of astral contact, it'll kind of like unfold gradually over the next year or something like that.

ANDREA: Yes. and again, you never know because I have clients that have gone from zero contact to overnight contact, like physical contact, almost physical astral, but they've gone from zero. I've had clients that they've gone from not really understanding this to having a portal open up in their house and be on Earth.

DR. SALLA: So, so by clients, I mean you, you teach a class or you do therapy, but what is it that you're doing with people?

ANDREA: Yes. So I do telepathy for them. So I try not to telepath for them. I try to give them the tools to telepath for themselves so they're able to then have their own experiences. So what I do is initially contact their person and put them in contact.

I also do remote viewing. I teach people how to remote view. I get people contact upstairs. So I make connections to them so they can go upstairs. And I'm really kind of just I always remind myself of the old telephone operator who's putting in the plugs and that's basically what I do.

But I mean, none of us can predict what kind of contact someone's going to have because I've just seen it and witnessed it with my own clients. People who want to have contact, never had contact. They're so depressed. They've spent years trying to get contact and they get contact that night. Strong contact. They see ships they have here. What we've been told by the extraterrestrials that I work with in my squadron, whatever you call it, be ready.

DR. SALLA: Okay. Yes. So where do people go to find out more about what you're offering or if they want to make contact with you,

where do they need to go online? **ANDREA:** Yes, I have it at growingupalien.com.
DR. SALLA: Growingupalien.com. So if people go there, they get all the information about you, your classes and they can make contact with you. Well, that's, that's, that's wonderful. Well, thank you for sharing all of this really amazing information. Any kind of final, words you want to say, parting words to, to my audience?
ANDREA: Well, Eeka, of course, he's hugging me now. Yes, he loves everyone. And you it's just our thing is, it's so crucial that everyone steps forward. Everyone remembers who they are. Don't be afraid of anything. Step forward. It's critical.
DR. SALLA: Wonderful. Well, thank you, Dr. Andrea Martin for sharing your, your history and your amazing contacts. So thank you, and Aloha.
ANDREA: Thank you, Michael. It was an honor.
